

Scott A. Foster

Class of 1988

Scott Foster is the president and chief executive officer and sole shareholder of Dominion Capital Management, Inc., located in Traverse City, Mich. Prior to forming Dominion, Foster was senior trader for A.O. Management Corporation in Pittsburgh.

Organized by Foster in 1994, Dominion has been a pioneer in developing unique alternative investment strategies for institutional investors in Asia, Europe and North America. Drawing heavily on his background in the study of philosophy and psychology, Foster developed a comprehensive approach to trading markets based on the philosophical principles espoused in Austrian economic theory and the psychological principles governing behavioral finance.

These ideas, often at odds with traditional financial engineering, have led to Foster being a sought-after speaker at conferences and institutions around the world. In addition to lectures, presentations and keynote speeches in more than a dozen countries, Foster has been featured in many books, articles and financial journals.
